TIMS MVP® for FEES

The ultimate solution for recording, editing, & archiving of FEES studies

- Record from any FEES scope at 30 frames per second with synced audio (Olympus, Pentax, Ambu, Karl Storz, ATMOS, PatCom, Optim, JEDMED, & more!)
- Record the entire study or use scope button or foot pedal and capture just what you need
- Automatic swallow detection
- Superior workflow & editing: subclips, split/combine, composite clips
- Label, annotate, graphic telestration
- Standard & customized scorecards
- Template-based reporting, notes, and smart phrases
- Side-by-side study compare
- Archive to any PACS, VNA, & EMR
- TIMS Review for remote review & analysis
- TIMS Connect for live remote collaboration
- TIMS PatientView for inset view of the patient

Compatibility
TIMS MVP connects to any FEES scope and records the entire study at 30 fps in full color at maximum resolution with synced audio.

Share to PACS & EMR
TIMS MVP archives your FEES studies to any PACS or VNA, ensuring study availability on the EMR and throughout the healthcare enterprise. Eliminate imaging silos!

Superior Workflow
At study completion, send it to the TIMS Review software in the speech office. This frees the FEES system for immediate use for the next patient, and allows for instant editing, scoring, and reporting.

Productivity
Quickly extract just the video you need, and jump right into scoring, annotation, reporting, and more. Enhanced productivity, and with better patient outcomes!

Eliminate Removable Media & Reduce HIPAA Risks
TIMS MVP keeps your workflow all digital. No more memory sticks, CDs, or DVDs to store and transport studies.

Intuitive Software Interface
No more complicated and clunky workflows from outdated FEES software. TIMS MVP is simple to use and includes powerful editing and analysis tools.
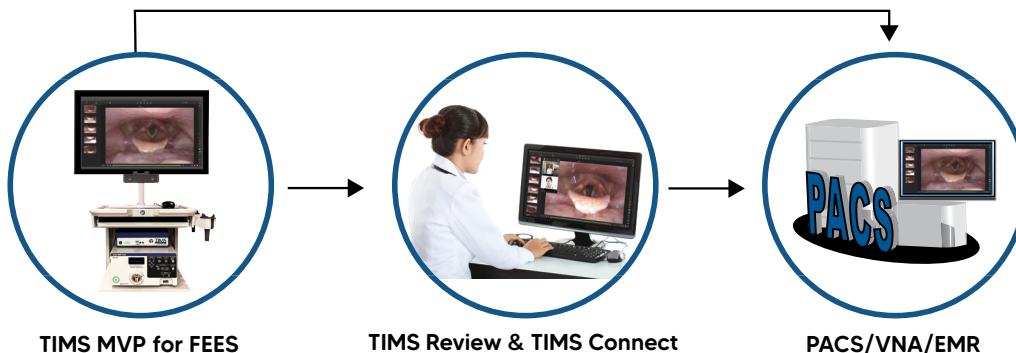

Reporting
Easy-to-use template-based reports lets you deliver comprehensive reports that are built as you score and make notes. Images are automatically added to the report.

## TIMS MVP for FEES Workflow with TIMS Review

After the study is performed, it can be sent directly to PACS. For a more productive workflow, the study can be sent to the TIMS Review software in the speech office for review, editing, annotating, scoring, and reporting. The study is then sent to PACS for availability in the EMR.

TIMS MVP for FEES → **TIMS Review & TIMS Connect** → **PACS/VNA/EMR**

⦿ TIMS MVP for FEES

TIMS Review, the Hub of FEES Study Productivity: One license of TIMS Review software is included with every TIMS system and is typically installed in the speech office. After the study is performed, it is sent to TIMS Review, freeing up the FEES system for the next patient. Completed studies can be reviewed, edited, labeled, scored, and reported on. This very productive workflow allows for more studies to be performed each day.

TIMS Connect: Included free for one year, TIMS Connect transmits the live procedure, including two-way USB camera video and audio, from wherever the FEES study is performed to a TIMS Review system on the hospital network. Applications include training, supervision, and interactive collaboration between SLPs and ENT physicians on patient care during the live procedure. TIMS Connect can be licensed as a yearly subscription after the first year.

TIMS PatientView: Included free for one year, TIMS PatientView allows you to optionally add a picture-in-picture video inset of the patient from a USB camera as part of the FEES study. TIMS PatientView can be licensed as a yearly subscription after the first year.

⦿ TIMS MVP Ordering Guide

TIMS 2000 FEES L
For use with FEES endoscopy stacks
(Olympus, Pentax, etc.)

TIMS FEES USB Mobile Cart Package
For use with USB FEES scopes only
(ATMOS, PatCom, Optim, JEDMED, etc.)

TIMS FEES Mobile Cart Package
For use with other FEES scopes
(Ambu, Karl Storz, etc.)
