TIMS MVP® for Endoscopy

The solution for endoscopy study recording, editing, annotating, reporting, & archiving to PACS/VNA

- For ENT, GI, & Surgical Imaging
- Record snapshots & motion video using the endoscope button or foot pedal
- Archive to any PACS, VNA, & EMR
- Superior workflow & editing: trimming, subclips, split/combine, composite clips
- Label, annotate, graphic telestration
- Template-based reporting with integrated notes and quick phrases
- Integrated diagram tool (patent-pending)
- Side-by-side study compare
- TIMS Review for remote review, analysis, & reporting
- TIMS Connect for live remote collaboration
- TIMS PatientView for inset view of the procedure room

Eliminate your outdated "imaging silos", removable media, or printing solutions and gain connectivity to your existing Enterprise Imaging system!

Compatibility
Acquire from any endoscopy system including Olympus, Pentax, Fujifilm, Ambu, Stryker, Karl Storz, Richard Wolf, ATMOS, PatCom, Optim, JEDMED, and more. Simple & cost-effective. Record still images and motion video by pressing the endoscope button.

Productivity
TIMS MVP saves time every step of the way. From setup to send, the workflow has been streamlined to reduce time spent in the endoscopy suite. The included TIMS Review software allows studies to be reviewed, edited, annotated, and reported on outside the procedure room.

Editing Studies
TIMS MVP and the included TIMS Review software both have built-in tools for quickly and efficiently interpreting completed studies. The intuitive interface allows for trimming videos and extracting images and video segments.

Template-Based Reporting
Easy-to-use customized reports lets you deliver comprehensive reports that are built as you make notes and analyze the study. Images are automatically added to the report.
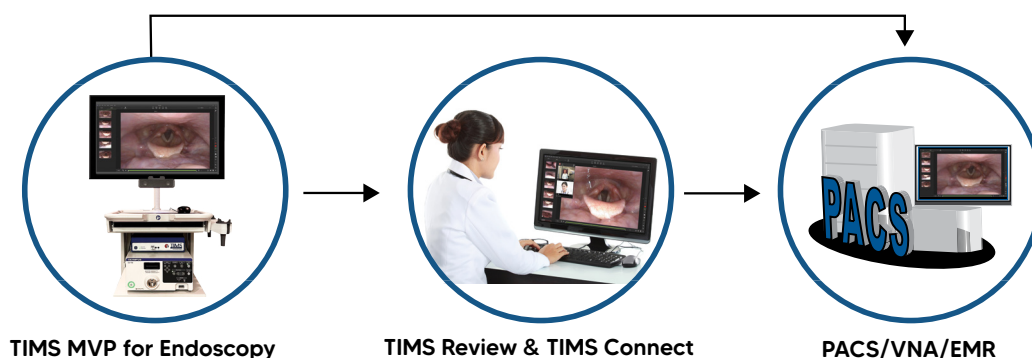

Patent-Pending Diagram Tool
Innovative and integrated diagram tool provides for selection with each image and is automatically placed in the report.

Connectivity with PACS, VNA, & EMR
Gain the productivity of having all of your endoscopy studies instantly available on your existing Enterprise Imaging solution (PACS, VNA, EMR). TIMS MVP is compatible with all archiving systems.

TIMS MVP for Endoscopy Workflow with TIMS Review

After the study is performed, it can be sent directly to PACS. For a more productive workflow, the study can be sent to the TIMS Review software in the endoscopy reporting room for review, editing, annotating, scoring, and reporting. The study is then sent to PACS for availability in the EMR.

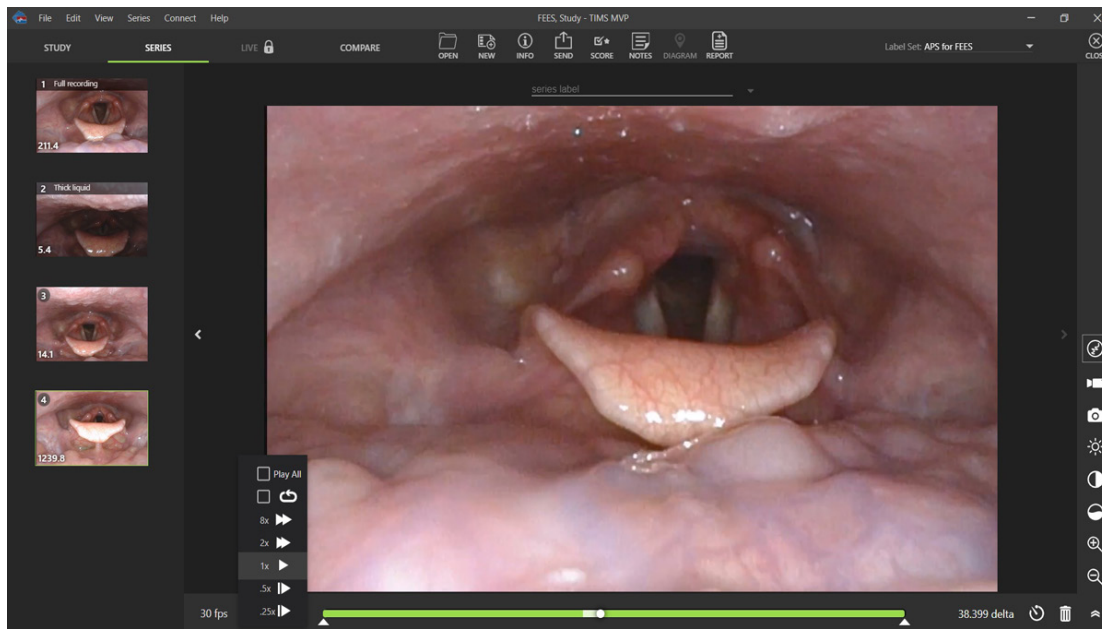

TIMS MVP for Endoscopy   TIMS Review & TIMS Connect   PACS/VNA/EMR

TIMS MVP, TIMS Review, & TIMS Connect Workflow

TIMS Review, the Hub of Endoscopy Study Productivity: One license of TIMS Review software is included with every TIMS system and is typically installed in the endoscopy reporting room. After the study is performed, it is sent to TIMS Review, freeing up the endoscopy system for the next patient. Completed studies can be reviewed, edited, labeled, scored, and reported on. This very productive workflow allows for more studies to be performed each day.

TIMS Connect: Included free for one year, TIMS Connect transmits the live procedure from wherever the endoscopy study is performed to a TIMS Review system on the hospital network. Applications include training, supervision, and interactive collaboration between clinicians on patient care during the live procedure. TIMS Connect can be licensed as a yearly subscription after the first year.

TIMS PatientView: Included free for one year, TIMS PatientView allows you to optionally add a picture-in-picture video inset of the procedure room from a USB camera as part of the endoscopy study. TIMS PatientView can be licensed as a yearly subscription after the first year.

TIMS MVP Ordering Guide

TIMS 2000 EN L
For use with endoscopy stacks
(Olympus, Pentax, etc.)

TIMS USB Mobile Cart Package
For use with USB scopes only
(ATMOS, PatCom, Optim, JEDMED, etc.)

TIMS 2000 EN Mobile Cart Package
For use with other ENT single use scopes
(Ambu, Karl Storz, etc.)
