

Speech Pathologists: Swallow Studies in DICOM!

***Still using low-quality video tape or DVD-video?
Upgrade to DICOM, higher quality, & instant access!***

TIMS 2000 SP benefits for speech pathology!

Record the entire procedure:

TIMS can record the entire swallow study and have it available for immediate review.

High resolution & synced audio:

TIMS records at high resolution (1024 x 1024) at 30 fps for superior image quality, with synced audio.

Instant access:

TIMS provides instant access to your studies. There is no rewinding or fast-forwarding the tape or DVD. Just click and you are there – immediately.

Viewer and timer: TIMS provides a free DICOM Viewer with a stopwatch timer in the 100s of a second for timing swallow events.

Record to CD/DVD: TIMS records your speech pathology studies on CD/DVD or USB memory sticks, along with our DICOM Viewer, for immediate review on your own computer.

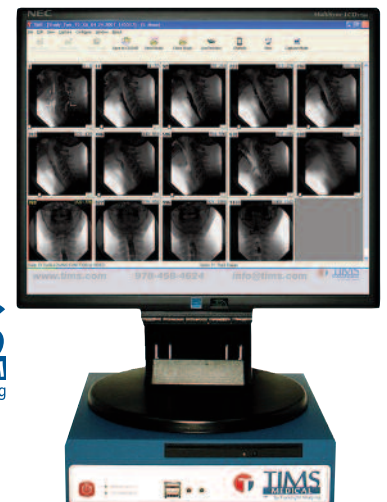

DICOM format: All studies are in the medical industry-standard DICOM format.

DICOM send: TIMS can send studies, or portions of studies, to PACS so that you can have a permanent archive on PACS.

Editing: TIMS allows simple and easy editing of studies.

Remote review: Send studies to the TIMS DICOM Review Software (TDRS) to review and analyze studies from outside the fluoroscopy room or in your own office.

Customized annotations: Create your own pick lists of customized annotations to quickly label each video series.

Contact us now for an online demo of how TIMS can benefit your speech pathology department today.
